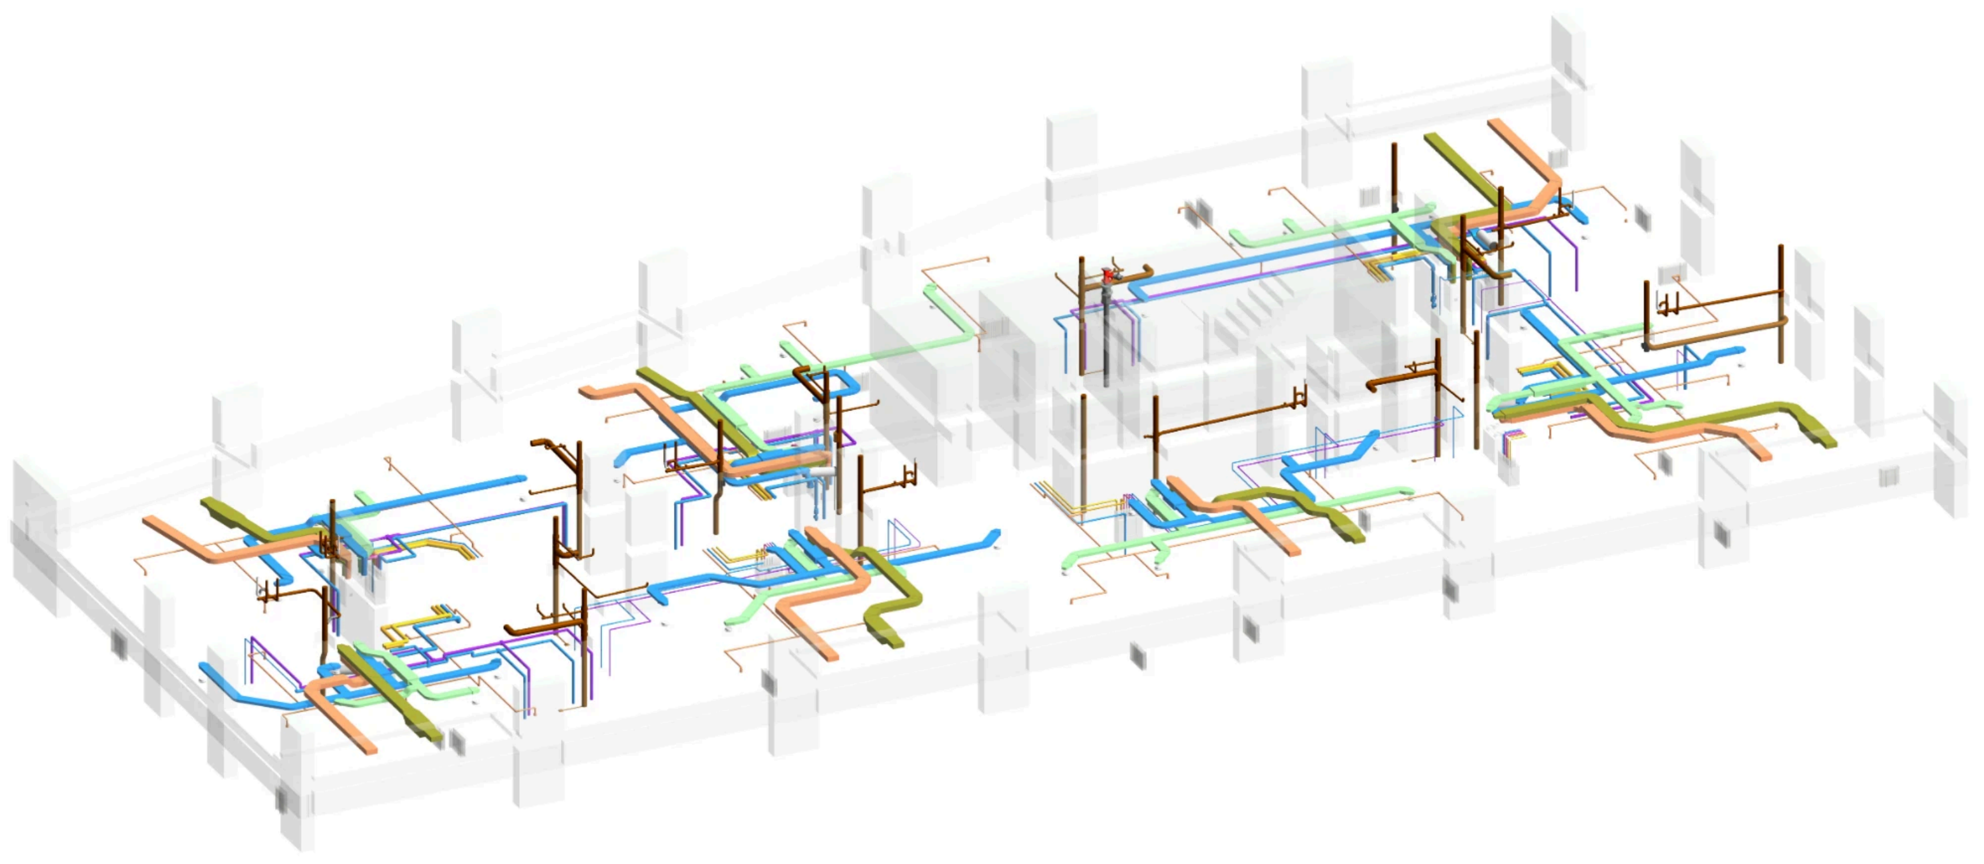
Every system in its place.

BIM modelling and coordination



SERVICES

Building services BIM, from plant to rack.

Modelling, coordination and validation for the MEPH services and specialist equipment that keep complex buildings running.

BIM management

Model development, QA and deliverables managed from Stage 3 through to construction.

Clash detection

Navisworks federated model reviews, issues tracked in Autodesk Forma, and workshops until every clash is closed.

Fabrication modelling

Fabrication-level MEP and CSA models for DfMA, prefabrication and OFCI vendor equipment, with builderswork and access coordinated.

Site and handover

Construction sequencing, installation tracking and close-out information ready for operations.

Scope

We review your design information and confirm scope and programme.

Model

Building services developed to the agreed level of detail and project standards.

Coordinate

Clashes identified, reviewed with the design team and resolved.

Issue

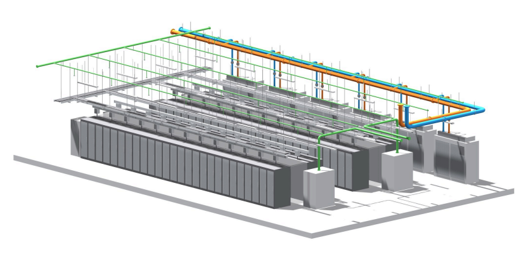
Validated models and drawings issued to your common data environment.

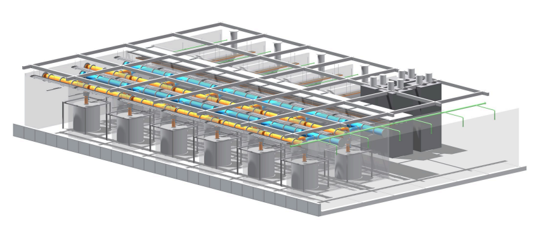
ISO 19650 · COBIE · UNICLASS — REVIT · NAVISWORKS · AUTODESK FORMA · REVIZTO

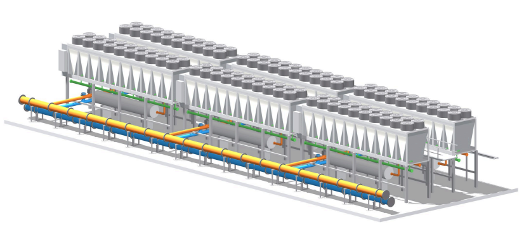
WORK

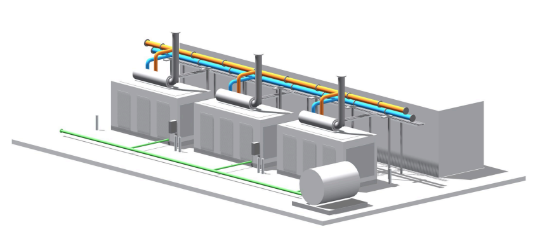
Selected models.

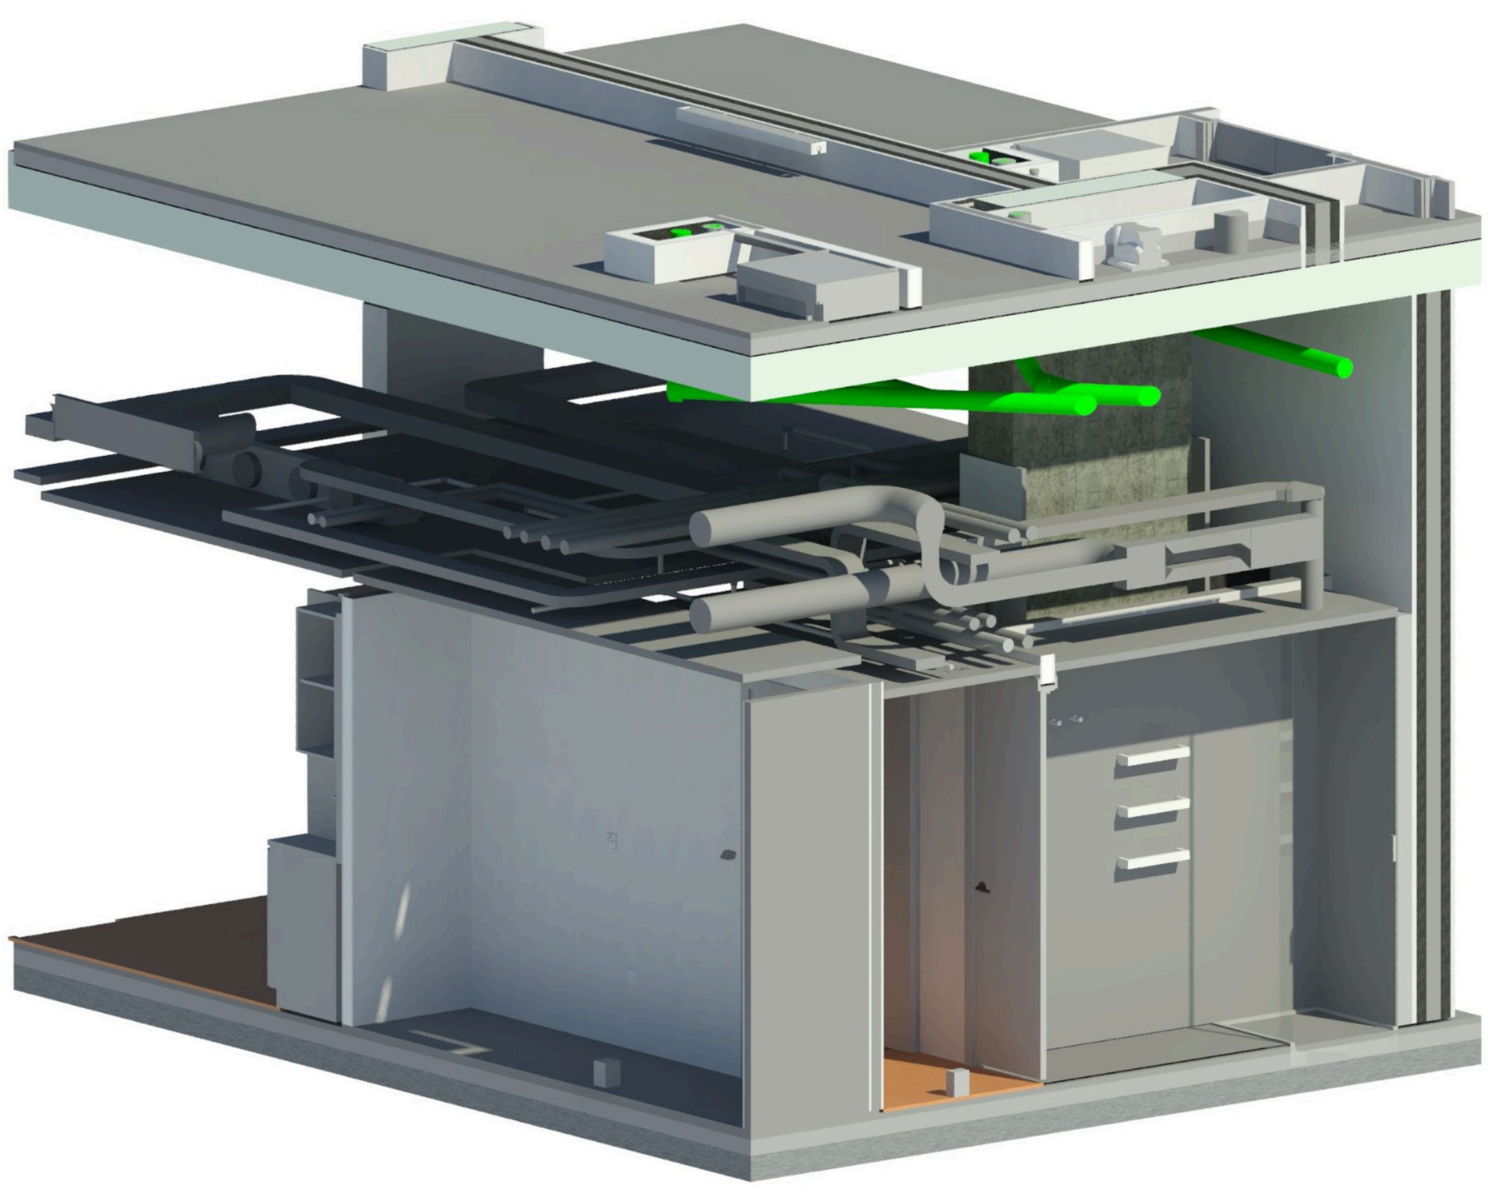
Representative views of the systems we model. Client projects are confidential, so details are shared on request.

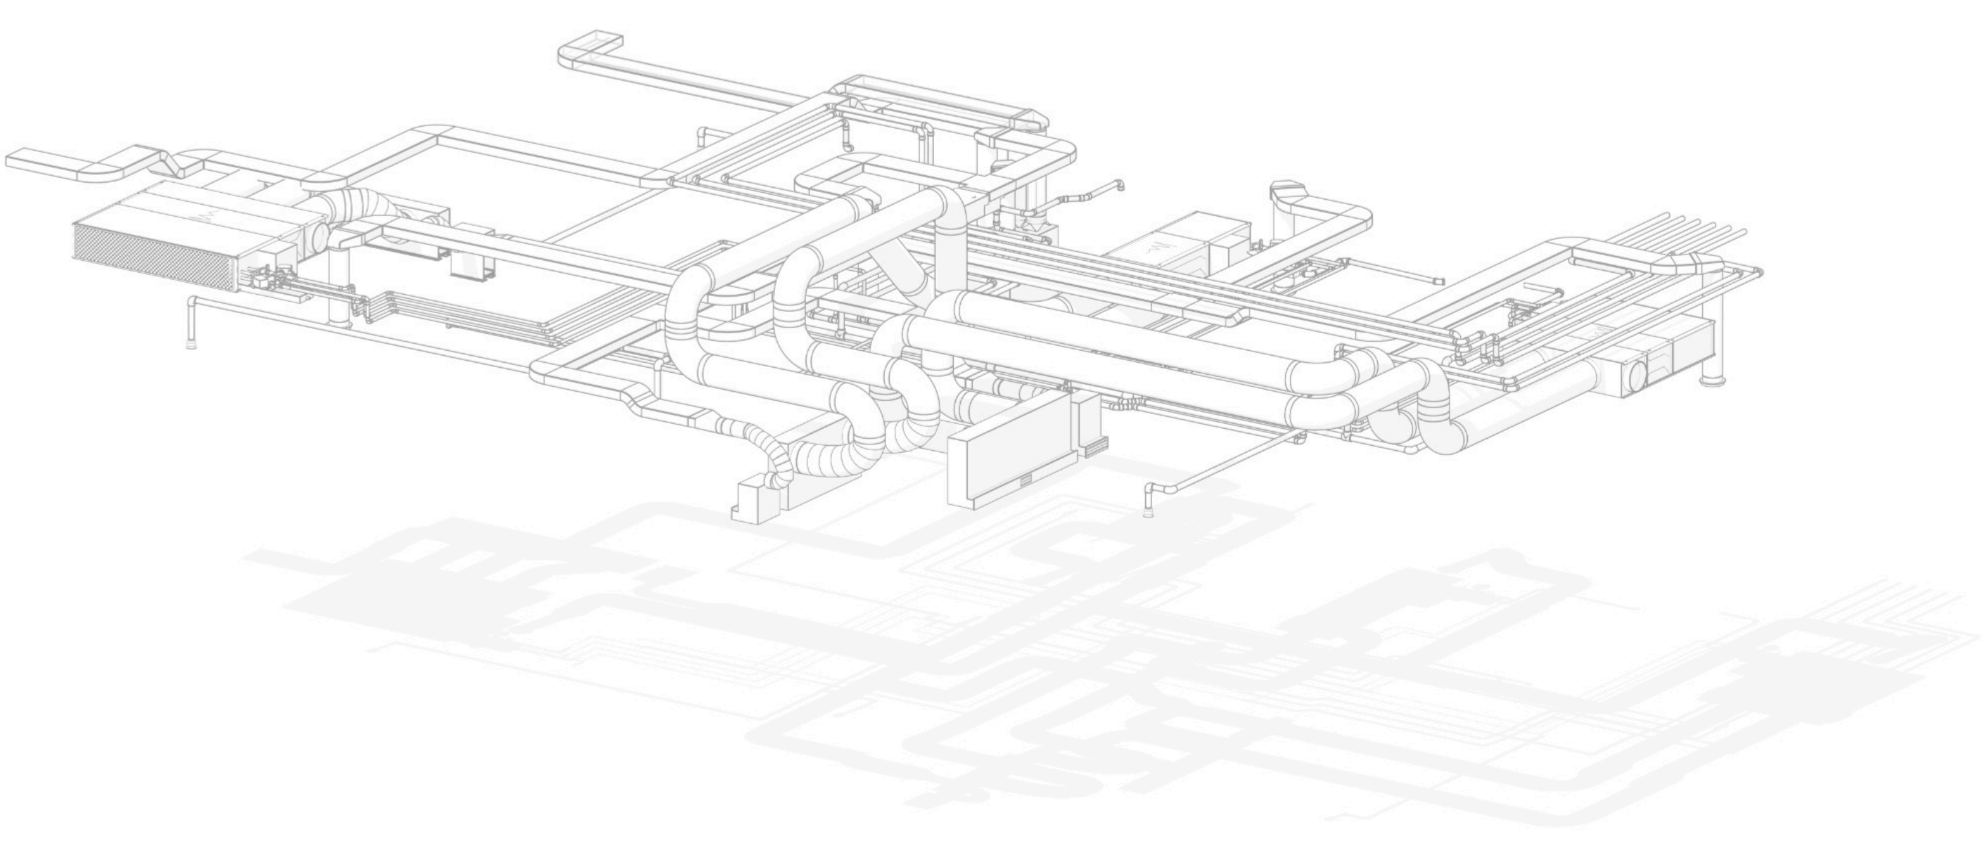












ABOUT

A building services BIM consultancy.

whitespace - bim is a digital construction consultancy with over ten years of MEP and CSA coordination on data centre, pharmaceutical, gigafactory, commercial and residential projects across the UK and Europe. Our experience spans main contracting, specialist contracting and consultancy, so every model is built with installation in mind.

Critical systems

MEPH services and specialist equipment, coordinated across GC1–GC2 interfaces and OFCI vendors.

Coordinated delivery

Federated reviews, client reporting and trade workshops, with every design issue tracked to close.

Built for site

Fabrication-level detail, construction sequencing and installation tracking, informed by site experience.

CONTACT

Let's talk about your project.

Send us your drawings or a short description of the scope, and we'll come back to you with a preliminary programme of works.
