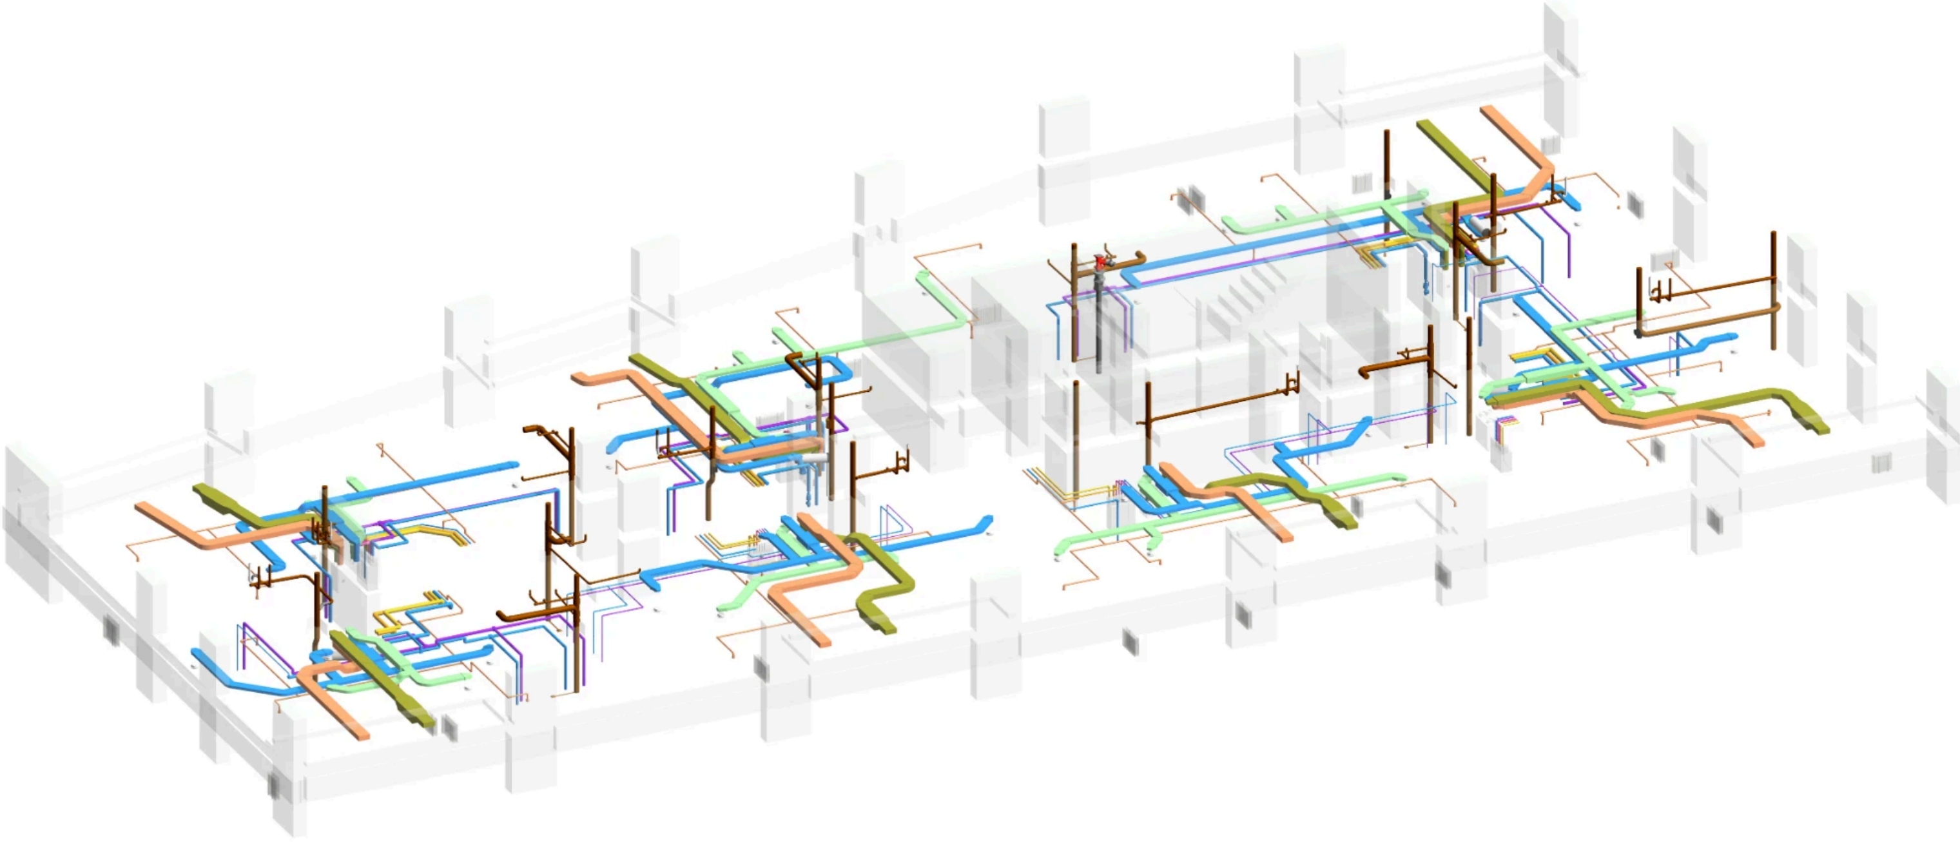
Every system in its place.

BIM modelling and coordination



SERVICES

Building Information Modelling, from plant to rack.

Modelling, coordination and validation for the MEPH services and specialist equipment that keep complex buildings running.

BIM management

Model development, QA and deliverables managed from Stage 3 through to construction.

Clash detection

Navisworks federated model reviews, issues tracked in Autodesk Forma, and workshops until every clash is closed.

Fabrication modelling

Fabrication-level MEP and CSA models for DfMA, prefabrication and OFCI vendor equipment, with builderswork and access coordinated.

Site and handover

Construction sequencing, installation tracking and close-out information ready for operations.

Scope

We review your design information and confirm scope and programme.

Model

Building services developed to the agreed level of detail and project standards.

Coordinate

Clashes identified, reviewed with the design team and resolved.

Issue

Validated models and drawings issued to your common data environment.

Ways to work with us

Bureau

We model and coordinate from our own studio, to your standards and programme.

Embedded

A BIM lead or coordinator working within your team, on site or in the office.

Support

Short-notice capacity to recover a programme or clear a coordination backlog.

Deliverables

Federated models · Clash reports · Coordinated drawings · Builderswork packages · Fabrication models

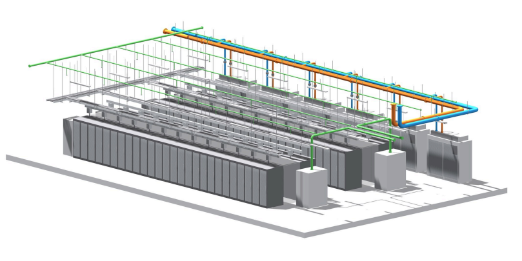
Installation tracking · COBie data · As-built models

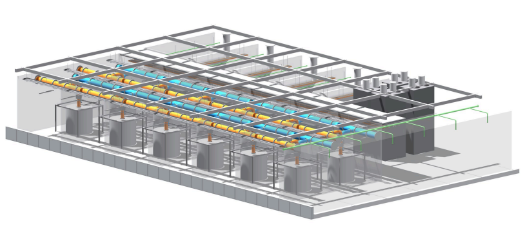
ISO 19650 · COBIE · UNICLASS — REVIT · NAVISWORKS · AUTODESK FORMA · REVIZTO

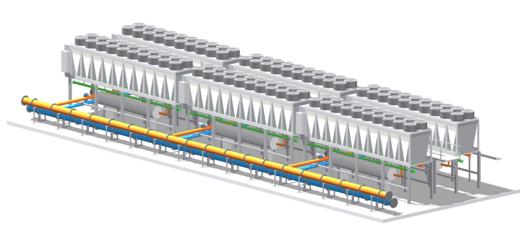
WORK

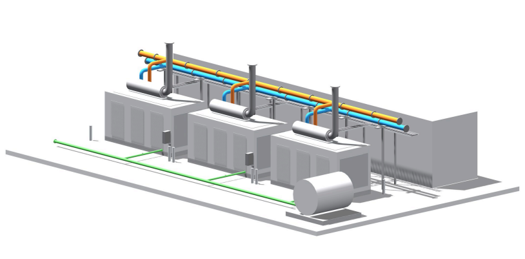
Selected models.

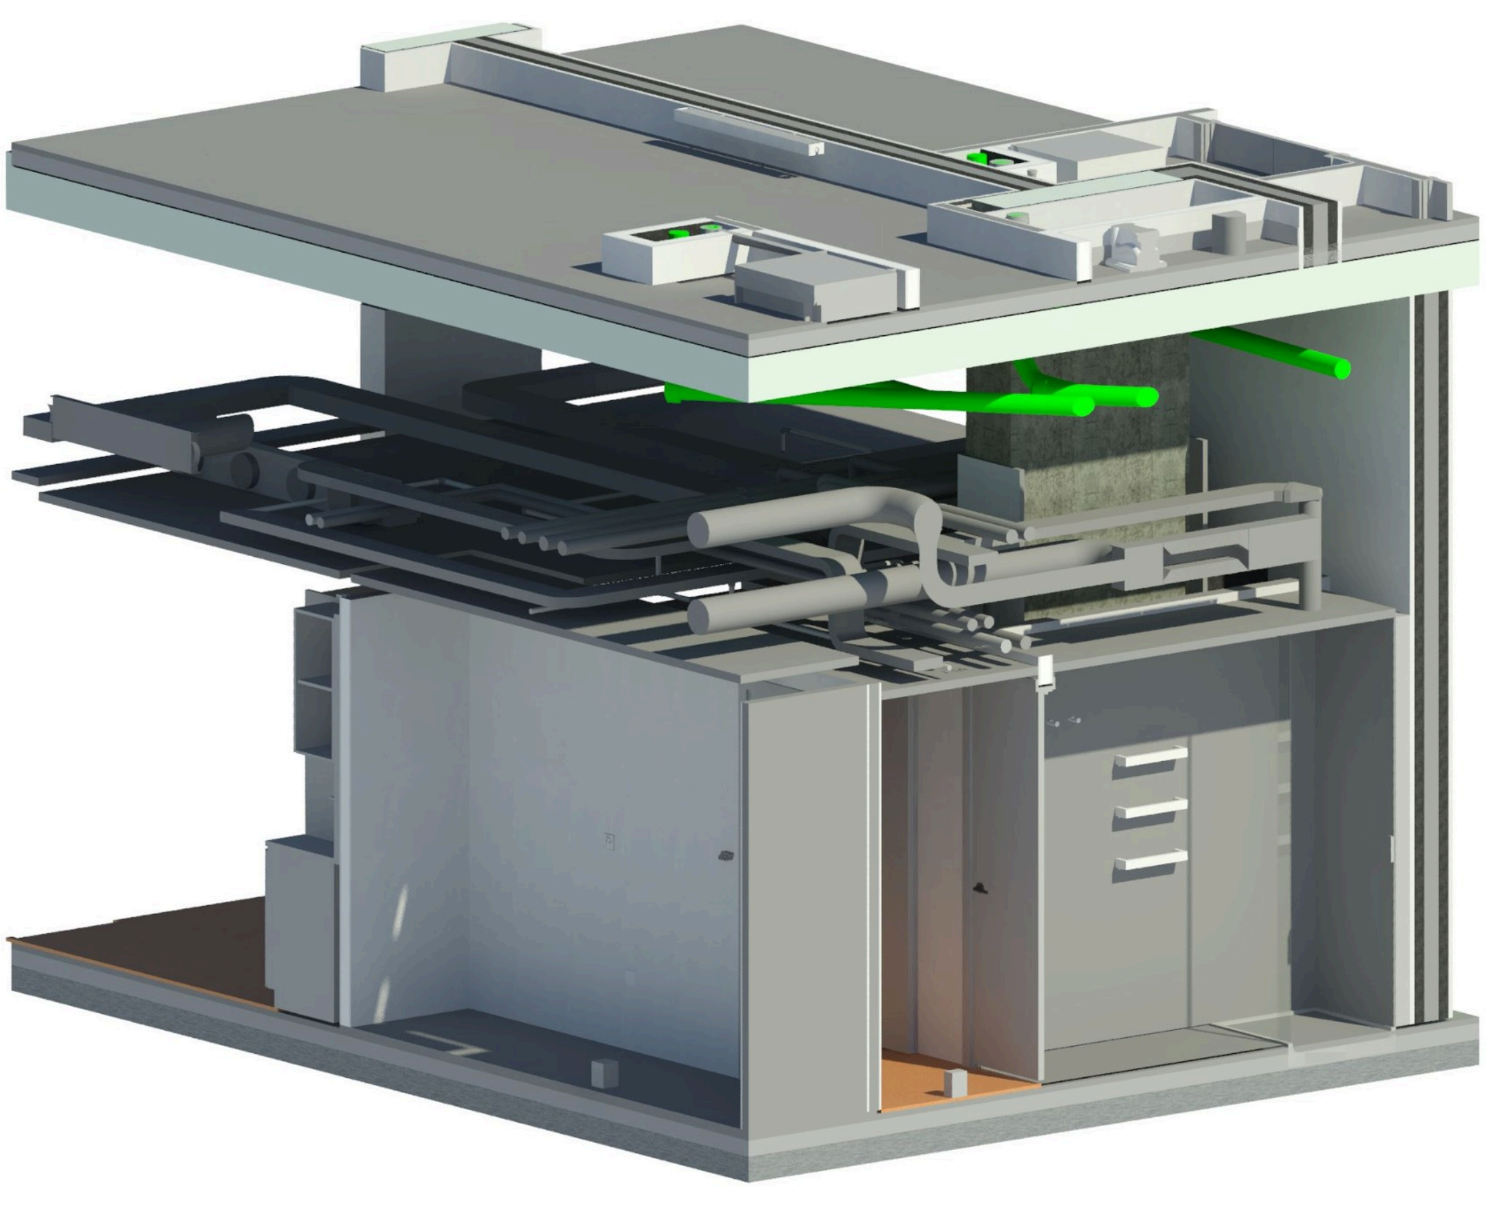
Representative views of the systems we model. Client projects are confidential, so details are shared on request.











ABOUT

A building services BIM consultancy.

whitespace - bim is a digital construction consultancy with over ten years of MEP and CSA coordination across the UK and Europe. Our experience spans main contracting, specialist contracting and consultancy, so every model is built with installation in mind.

10+	Stage 3–5	MEP & CSA	UK & Europe
Years of coordination	Design through construction	Disciplines coordinated	Projects delivered

Critical systems

MEPH services and specialist equipment, coordinated across GC1–GC2 interfaces and OFCI vendors.

Coordinated delivery

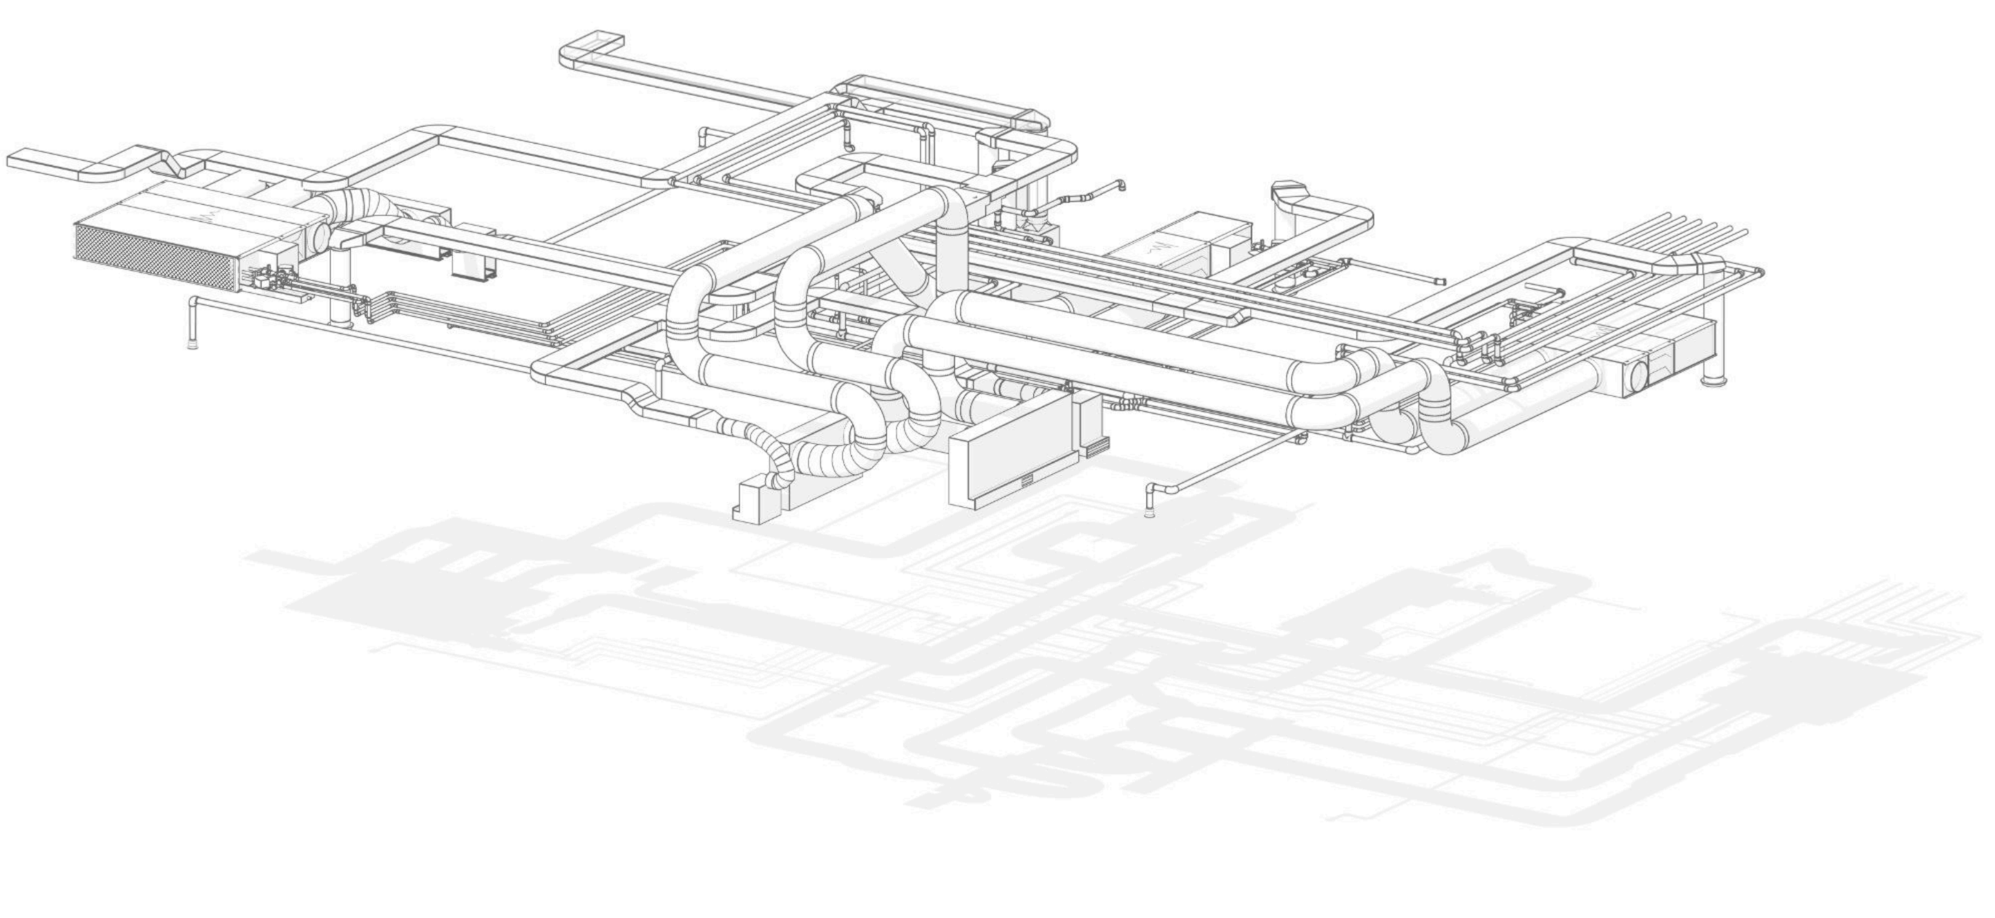
Federated reviews, client reporting and trade workshops, with every design issue tracked to close.

Built for site

Fabrication-level detail, construction sequencing and installation tracking, informed by site experience.

Sectors

Data centres · Pharmaceutical · Gigafactories · Commercial · Residential



CONTACT

Let's talk about your project.

Send us your drawings or a short description of the scope, and we'll come back to you with a preliminary programme of works to begin the discussion.
