Every system in its place.

BIM modelling and coordination for data centres.

Chillers · Generators · Cooling pipework · Containment · Data racks

Services

Model validation

Every model audited for accuracy, data and standards before it is issued.

Clash detection

Federated models, tracked clashes and weekly coordination, resolved before site.

MEP modelling

Plant, pipework and containment modelled to LOD 400.

Handover

Asset data and as-built models ready for operations.

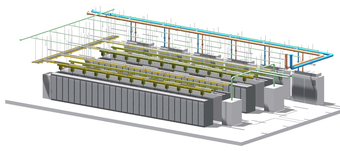

01
Scope
Drawings in, fee and programme back.

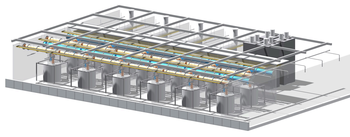

02
Model
Services modelled to the agreed detail.

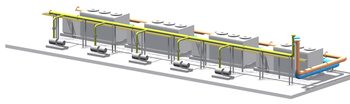

03
Coordinate
Clashes found, tracked and closed.

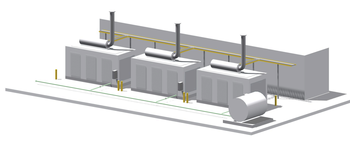

04
Issue
Validated models and drawings to your CDE.
