# Every system in its place.

BIM modelling and coordination

## Model validation

Every model audited for accuracy, data and standards before it is issued.

## Clash detection

Federated models, tracked clashes and weekly coordination, resolved before site.

## MEP modelling

Plant, pipework and containment modelled to LOD 400.

## Handover

Asset data and as-built models ready for operations.

### Scope

Drawings in, fee and programme back.

### Model

Services modelled to the agreed detail.

### Coordinate

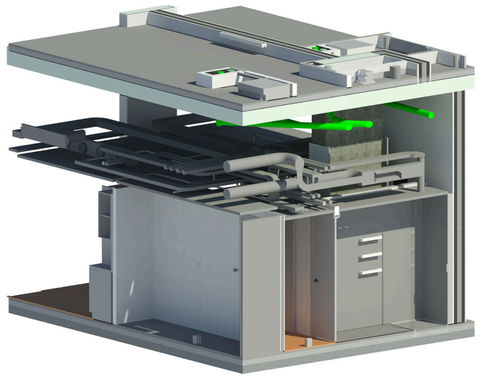

Clashes found, tracked and closed.

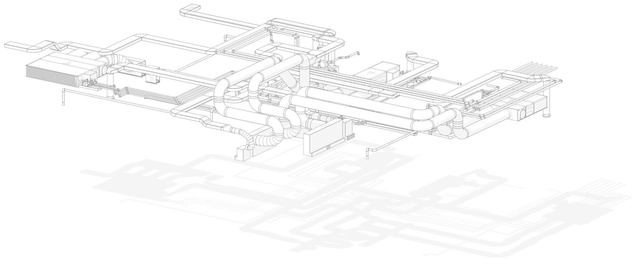

### Issue

Validated models and drawings to your CDE.
